

Contents

Artificial neural networks in estimating the productivity of a forest harvesting machine	01-07
Potential Utilization of Empty Fruit Bunch (EFB) for Paper Making	08-11
Electronic Waste (E-Waste): Sources, Proliferation, Effects & Management in Developing Nations	12-27
Real World Applications and Research Directions for Machine Learning: Challenges and Defies	28-32
Free Flexural Vibration Analysis of Simply Supported Kirchhoff Plates by Ritz and Galerkin Methods: a Comparative Approach	33-40
Performance Of Carbon Fibers Integrated To The Coating As Anode In The Cathodic Protection Of The Reinforcing Steel of Concrete Contaminated With Chloride	41-51
Quality of hydropneumatic and pneumatic sprays on conilon coffee plants	52-58
Performances of Reconstruction Algorithm on Compressive Sensing Monostatic and Bistatic Mimo Radar	59-74
Design and Implementation of Two Tank Level Control System	75-79
